MEDICEUTICALS®

Beautiful, healthy hair starts with a healthy scalp.

Mediceuticals® Laboratories, based in New Jersey USA, develops and delivers unique products that help the hair and scalp to be in optimum condition. These products help to reduce excessive hair loss and thinning hair. Mediceuticals® also provides effective methods of treatment for a wide range of hair and scalp problems. Our product development process consists of many years of pharmaceutical research. The products are composed of natural, non-aggressive ingredients and raw materials.

Mediceuticals® products are sold through professional salons, spas and hair restoration clinics. After attending an in depth product training, the salons are equipped to make a correct diagnosis and give tailored product advice to their customers.

Mediceuticals® treatments have been used for decades by many professionals in the United States. Mediceuticals was launched in Europe in October 2010. Due to the demand, the European market has grown extensively. Mediceuticals® is currently available on the following continents: North America, Europe, Asia, Oceania and Africa.

UNIQUE COMPLEXES

Supports the reduction of excessive hair loss and stimulates new hair growth. Focuses on the 3 main causes of hair loss; 5 α -Reductase (converts to DHT), insufficient blood circulation and weak anchoring of the hair.

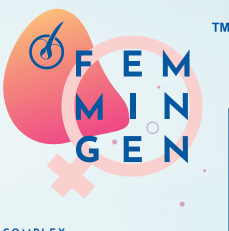

A natural anti-androgen compound. This complex consists of various vitamins and minerals that inhibit the formation of DHT in the hair follicle. In addition, this complex purifies the scalp from, among other things, DHT (Dihydrotestosterone), the primary cause of hair loss.

A unique complex to increase the microcirculation of the scalp, thereby stimulating blood flow to the hair follicles. This ensures a better uptake of oxygen and nutrients needed for the development of healthy hair follicles and hair growth.

Free from SLS and SLES, this unique complex cleanses clogged hair follicles carefully and thoroughly, promoting healthy hair growth.

A natural anti-androgen compound. This complex consists of various vitamins and minerals that inhibit the formation of DHT in the hair follicle. In addition, this complex purifies the scalp from, among other things, DHT (Dihydrotestosterone), the primary cause of hair loss.

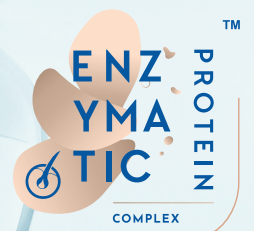

Mediceuticals® products feature a number of unique complexes that are a combination of natural, non-aggressive ingredients and raw materials.

Each unique complex includes targeted nutrients, in carefully calculated doses, that work synergistically to radically benefit your scalp and hair.

A complex that is developed to protect color treated hair against UV radiation and 'shampoo washout', resulting in a more lively and long-lasting color result.

Biotechnological complex of plant origin enzymatic protein. This complex helps to balance the pH value of the hair for optimal hair condition. Provides maximum protection for the hair during chemical treatments such as coloring or bleaching the hair.

SCALPRO HAIRBRUSH

MEDICEUTICALS

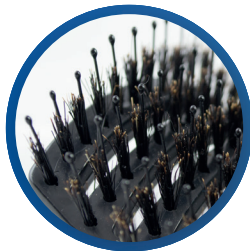

BENEFITS

- ◆ Can be used for any hair type, including curly hair, long hair and hairpieces or extensions.
- ◆ Detangles easily and glides effortlessly through the hair.
- ◆ Suitable for people with a sensitive scalp and therefore ideal to use on children's hair.
- ◆ Made with silicone pins that help protect the scalp and hair.
- ◆ Specially designed to be used in combination with a hair dryer due to the openings on the top.
- ◆ Thanks to its special shape, the Scalpro fits comfortably on the scalp, making it easier and more efficient to brush the hair.

The Mediceuticals Scalpro hairbrush detangles the hair easily and glides effortlessly through the hair without damaging the hair or scalp. The brush can be used for all hair types, including curly hair, long hair and hairpieces or extensions.

Smoothing & detangling hairbrush

The brush has an anti-static effect due to the natural bristles that smoothes the hair cuticle. The brush is ideal for people with a sensitive scalp and therefore ideal for use with children's hair.

Made of soft material and silicone pins that help protect the scalp.

Fits comfortably on the head, detangles the hair very easily and glides effortlessly through the hair.

Specially designed for use in combination with heat applications such as a hair dryer.
